PROFILE

Passionate Computer Science student specializing in IoT, Cybersecurity, and Blockchain Technology. Skilled in building responsive, scalable, and secure full-stack web applications using modern frontend and backend architectures. Possesses a strong foundation in data structures, algorithms, and system design, with hands-on expertise in smart contract development, RESTful APIs, and security best practices. Proven track record in technical leadership and competitive programming, eager to contribute to collaborative software engineering teams.

SKILLS

- **Programming Languages:** C, Java, Python, JavaScript, Solidity
- **Web & Backend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, REST APIs, WebSockets
- **Databases & Cloud:** PostgreSQL, Supabase, MongoDB, MySQL, Oracle Database, AWS Foundations
- **DevOps & Developer Tools:** Git/GitHub, Docker, VirtualBox, VMware, VS Code
- **Cybersecurity Tools & OS:** Nmap, Wireshark, Metasploit, Autopsy, Kali Linux, Red Hat Linux, Ubuntu, Windows

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering, <i>Vasireddy Venkatadri International Technological University</i> CGPA: 9.1/10.0	2023 – Present Nambur
Intermediate, Narayana Junior Girls College Percentage: 96.3%	2021 – 2023 Vijayawada
SSC, Ravindra Bharathi School Percentage: 97%	2020 – 2021 Tadepalli

PROJECTS

NodeTalk 📄, *Real-Time Encrypted Messaging Platform*

Tech Stack: React.js, Node.js, Express.js, PostgreSQL (Supabase), WebSockets, JWT, Tailwind CSS

- Engineered a secure real-time messaging application enabling low-latency, one-to-one communication via WebSockets and Supabase Realtime.
- Implemented JWT-based authentication and PostgreSQL Row-Level Security (RLS) to enforce strict access control and data privacy.
- Designed responsive user interfaces with Tailwind CSS featuring live presence tracking, real-time message status updates, and optimized database queries.

CryptPact 📄, *End-to-End Encrypted Messaging Application*

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets, JWT

- Architected a secure real-time messaging system utilizing client-side encryption protocols to safeguard user data and communication privacy.
- Integrated JWT access management and WebSocket protocols to manage persistent, secure socket connections for instant delivery.
- Structured optimized MongoDB schemas for efficient storage and retrieval of encrypted chat logs, supported by responsive RESTful APIs.

SafeLink , IoT-Based Emergency Response Wearable

Tech Stack: ESP32, Arduino IDE, TinyGPS, ADXL345, Telegram Bot API, Wi-Fi

- Developed an IoT wearable safety system integrating ESP32 microcontrollers, fall detection (ADXL345), and sound sensors to trigger instant emergency responses.
- Connected GPS modules with Telegram Bot API to dispatch automated, real-time location tracking alerts to emergency contacts.
- Validated hardware performance and signal reliability through field testing with 50+ participants.

EventNest , AI-Powered Venue Booking Platform

Tech Stack: React.js, TanStack Start, Supabase, PostgreSQL, Tailwind CSS

- Built a full-stack venue booking platform incorporating AI-driven dynamic pricing estimation and inquiry workflows.
- Formulated role-based access control (RBAC) and real-time database subscriptions using Supabase for user dashboards.
- Constructed scalable backend services handling reservation management, file storage buckets, and high-concurrency requests.

LEADERSHIP & COMMUNITY ENGAGEMENT

Drafting and Editorial Committee Lead, IEEE Student Branch

02/2025 – 12/2025

- Spearheaded operational strategy, participant workflows, and logistics execution for VIVINYA 2K25, a national technical fest hosting 2,000+ attendees.
- Managed technical infrastructure and logistics for a week-long Red Hat Certified System Administrator (RHCSA) workshop serving 200+ engineering students.

VVITU, Nambur

Community Volunteer, Local Health Camps

04/2024 – 08/2024

- **Logistics & Outreach:** Coordinated resource workflows and conducted healthcare awareness campaigns across rural communities alongside medical professionals.
- **Data Management:** Maintained digitized patient intake records and registration logs to streamline operations during peak camp hours.
- **Community Impact:** Enhanced public health access and clinical onboarding efficiency for underserved populations.

Guntur, AP

ACHIEVEMENTS

- **Academic Gold Medalist:** Awarded institutional Gold Medal for securing Rank #1 across the department for academic excellence.
- **Nexora Full-Stack Project Expo:** Secured Consolation Prize for engineering a production-ready, full-stack application with scalable architecture.
- **Smart India Hackathon (SIH):** Qualified at the institutional level to represent the college, prototyping complex technical solutions.
- **Competitive Programming:** Earned Diamond Badge status on CodeChef through consistent algorithmic problem-solving.

CERTIFICATIONS

- **Cloud & DevOps:** AWS Academy Graduate – Cloud Foundations , Oracle Foundations Associate
- **Cybersecurity & Systems:** Deloitte Australia Cyber Job Simulation , Zscaler Networking Internship | Palo Alto Cybersecurity Internship , OPSWAT CIP , IBM Cybersecurity
- **Software Development & CS:** NPTEL Getting Started with Competitive Programming , HackerRank Java (Basic) , NPTEL Joy of Computing Using Python , MongoDB Introduction , TCS iON YUVA AI
